

URL Protocol

Protocol for displaying URL's in print material

Each Web page has one unique address — its URL. RCC's Web site architecture determines how the directories and pages are displayed. The following are examples for print:

- RCC's home page: www.roguecc.edu
- RCC's home page with a directory: www.roguecc.edu/Enrollment
- RCC's home page with a directory and a file: www.roguecc.edu/Enrollment/reg_schedule.asp
- RCC's home page linked to a secure server connection such as the Bookstore which handles payments: <https://www.roguecc.edu/Bookstore> (notice the "s" in the https://). This URL should be put in print material in its entirety.
- Any site on the Intranet must begin with https:// (<https://intranet.roguecc.edu>).

Instructional Web Servers

The Instructional Web servers are set up differently in that the "www" is replaced by the server name. The Instructional Web servers are:

- learn.roguecc.edu
- distance.roguecc.edu
- online.roguecc.edu

One of the Instructional Web servers with a directory and a file:

- distance.roguecc.edu/learning/quiz.cfm

Embedding URL's in e-mail or other electronically sent material

When including a URL within a Word document, PDF, or an e-mail in which you want the links to work, you *must* use a fully qualified URL when inserting the links. Examples are:

- RCC's home page: <http://www.roguecc.edu>
- RCC's home page with a directory: <http://www.roguecc.edu/Enrollment/>
- RCC's home page with a directory and file: http://www.roguecc.edu/Enrollment/reg_schedule.asp
- RCC's home page with a secure server (log in) is the same: <https://www.roguecc.edu/StudentResources.asp>

Instructional Web Servers

- <http://learn.roguecc.edu>, <http://online.roguecc.edu>, <http://distance.roguecc.edu>
- Servers with a directory: <http://distance.roguecc.edu/learning/>
- Servers with a directory and a file: <http://distance.roguecc.edu/learning/quiz.cfm>
