RCC Board eyes co-generation feasibility study

The Rogue Community College Board of Education will discuss and may take action on conducting a co-generation feasibility study in conjunction with the Bureau of Land Management.

The board will consider sharing with the BLM the cost of a study, which would explore development of a co-generation plant on the RCC Redwood Campus. The study would look at long-term cost savings for heating and energy production, the value of this type of system/application in southern Oregon, and the viability of an educational program related to alternative energy.

The RCC Board of Education will meet at 4 p.m. Tuesday, Feb. 17, on the Redwood Campus, 3345 Redwood Highway, Building H, Room 2, Grants Pass. Contact Denise Nelson, 956-7001, for more information.
