**Rodents discovered under RCC cafeteria**

GRANTS PASS — Facilities staff at Rogue Community College began soliciting quotes today to remove rodents discovered under the cafeteria.

“Before we can use any type of poisons, we have to exhaust other options, so we will have to try trapping them first,” said Grant Lagorio, director of Facilities and Operations. “We’re getting quotes right now and will likely begin removing them this weekend when we’re closed so it won’t interfere with operations.”

Facilities contacted the Josephine County Public Health Department today, Lagorio said, and let them know about the problem.
