Summer Science, Technology, Engineering, and Math (STEM) Offered to High School Students

GRANTS PASS/MEDFORD, Ore.--A one-week learning camp in science, technology, engineering, and math (STEM) for students entering 10th through 12th grades will be held at Rogue Community College (RCC) Table Rock Campus in White City, Oregon from Aug. 10-13.

- Excellent instructors from RCC and Oregon Technical Institute (OIT).
- A week of hands-on discovery experiences.
- Learn about careers and majors in science, technology, engineering and math.
- Learn first-hand about college life, career opportunities, and preparation.

RCC encourages students to think about who they want to be and what they want to do for a career. Jobs in STEM are growing at nearly twice the national average, meaning there will be well over 1 million unfilled tech jobs by 2020. Careers in STEM foster valuable 21st century life skills like problem-solving, creativity, and collaboration, while providing opportunities to create positive change and innovate a better world.

Cost is only \$160 and students must attend all four days. Tuition assistance may be available for low-income families. For more information, email pathfinder@rogucecc.edu or call call 541-245-7806.

Box lunch and all materials for activities are included. Students are responsible for breakfast, snacks, and transportation.

If you would like to highlight your summer with a great week of learning and career exploration, complete the STEM interest form at www.rogucecc.edu/pathfinder. Registration information will be provided upon completion of interest form. Space is limited.
