Objectives define what the goals are for the practicum experience. Overview for completing objectives:

They are in three parts as follows:

1. Learning Objective: This is what the student will learn to do. Usually worded as: "Student will learn/understand..." and then the goal. Example: "The student will understand the intake process for new clients."
2. Activity to complete: This is what the student will do to learn the above skill. Usually worded as: "Student will complete/observe/co-facilitate..." Example: "The student will observe supervisor/counselor at the agency completing several intake assessments for new clients."
3. Outcome measurement: This is how the student demonstrates that learning has occurred. Usually worded as: "Student will debrief/discuss/demonstrate the skill above." Example: "Student will debrief following the intake process with his/her supervisor" or "Student will complete an intake while observed by supervisor."

The first three objectives should reflect the skills for the first term. The fourth one is for self care.

Objectives can remain for more than one term if the student is still working on them and/or they can be altered to reflect new and changing skills at the beginning of each term of practicum. (They don't change during the term once completed.)

Objectives are reviewed/developed with agency supervisor and then signed initially and at midterm/final scoring.

Midterm and final evaluations should be coded according to the following scale:

- | | | |
|------------------|-----------------------|--------------------------|
| 1. Outstanding | 3. Average | 5. Unsatisfactory |
| 2. Above Average | 4. Improvement Needed | 0. No Opportunity to Act |

Please note: The evaluation of the agency supervisor is only a portion of your grade in seminar.

Term grades are assigned by the college instructor.
